### **The Company's Overview and Mission**

Terracon Geotechnique is an independent, Canadian consulting firm, wholly owned by its management staff. Established in 1978, the firm diversified and reorganized under the name Terracon Geotechnique Ltd. in 1983. The firm primarily serves the mining industry and the Athabasca Oils Sands region from its administrative office in Calgary and office, soils and concrete laboratory in Fort McMurray.

Terracon Geotechnique Ltd. is committed to achieving peerless safety and environmental benchmarks. We are responsible citizens who are driven by professional integrity and dedicated to extraordinary service. Every team member pledges to establish lasting relationships with our clients by exceeding contractual obligations, and trust through exceptional performance. We help the resource industry enhance their efficiency, accountability and environmentally friendly operations.
